## 2. FACTIONS & LORE

AION 2 is set 200 years after the original game. The conflict between Elyos and Asmodians continues even after Daevas temporarily lost their powers.

 ELYOS

THE RADIANT FACTION

|           |                                      |
|-----------|--------------------------------------|
| Homeland  | Elysea (sunlit lower half)           |
| Aesthetic | Angelic, radiant, white/golden wings |
| Theme     | Light, nobility, divine blessing     |

 ASMODIANS

THE SHADOW FACTION

|           |                                 |
|-----------|---------------------------------|
| Homeland  | Asmodae (shadowed upper half)   |
| Aesthetic | Dark, primal, spiked/dark wings |
| Theme     | Resilience, survival, strength  |

 KEY LORE POINTS

- ▶ The god Aion created Atreia with the Tower of Eternity as its axis
- ▶ The Cataclysm shattered the tower, splitting the world into two factions
- ▶ Players ascend as Daevas — immortal beings with the power of flight
- ▶ The two factions only meet in the Abyss for PvP warfare
- ▶ Elyos and Asmodian servers remain separate; factions clash in the Abyss

## 4. COMBAT SYSTEM

Hybrid action combat combining targeted skill selection with real-time active mechanics.

### SKILL CHAINS

Sequential inputs create combo chains based on target state

### ACTIVE DODGING

Manual dodge/roll with i-frames; positioning is critical

### PARRYING

Timed blocks reduce or negate incoming damage

### AERIAL COMBAT

Combat extends into full 3D space with flight

### HOLY TRINITY

Tank/Healer/DPS strictly enforced in group content

### SKILL = POWER

Gear AND mechanics both matter in outcomes

### KEY DIFFERENTIATOR

Two players of the same class can have vastly different functional skill-sets due to Stigma/Daevanion customization. A fully geared player with poor mechanics can lose to a skilled undergeared player.

## 5. FLIGHT & AERIAL COMBAT

Every Daeva has wings. Flight is a full 3D movement system affecting all content.

### FLIGHT MECHANICS

- Full 3D movement (ascend, descend, any angle)
- Energy bar drains over time
- High-speed wing skills drain faster
- Wings cannot be used in ground combat
- Momentum-based speed & altitude control

### FLIGHT ZONES

- Overworld: ~1 minute flight timer
- The Abyss: extended/unlimited flight
- Altitude limits enforced (invisible walls)
- **Blue wings** = safe | **Red wings** = danger
- Wings upgradeable as gear (stats + duration)

# 6. CHARACTER PROGRESSION SYSTEMS

Level cap is 45. True power comes from multiple parallel systems requiring deliberate engagement.

1900+  
Mid Endgame

→

2000+  
Competitive

 **LEVELING (1-45)**

- Follow Main Story Quests (yellow markers)
- Side quests for reputation
- Fastest path: story quests exclusively

 **DEVIANT SYSTEM**

- Alternative power source parallel to leveling
- Significant stat bonuses

⚠ Engage from **EARLY** game!

 **DAEVANION BOARDS**

- 6 boards (unlock Lv.12 → Lv.45)
- Skill modifiers (AoE, lifesteal, CC)
- Must specialize — can't max all

 **PANTHEON SYSTEM**

- Colossus, Sculptures, Masterpieces
- Core stats: Wisdom, Freedom, Death
- Permanent passive bonuses + presets

# 7. GEAR & ENHANCEMENT

 **UPGRADE PRIORITY ORDER**

| System       | Function                      | Materials Needed           |
|--------------|-------------------------------|----------------------------|
| Enhancement  | Increase gear base level      | Enhancement Stones + Kinah |
| Breakthrough | Push past enhancement caps    | Special materials          |
| Manastones   | Socket stat bonuses into gear | Drops, crafting, broker    |
| Spiritstones | Additional stat layer         | Dungeon rewards            |
| Godstones    | Proc-based weapon effects     | Rare drops                 |
| Soul Imprint | Permanent stat bonding        | Endgame progression        |
| Morphing     | Transform to higher tier      | Crafting materials         |

 **PRO TIP**

Early gear extraction returns all Enhancement Stones (costs only small Kinah). Don't be afraid to enhance leveling gear — you get stones back when you move on.

## 8. SKILL CUSTOMIZATION

### SKILL TREES

- Branching paths per class
- Points allocated during leveling
- Can be respec'd (costs Kinah)
- Determines rotation focus (burst/sustain/AoE)

### STIGMA SYSTEM

- Advanced build choices = YOUR class version
- More burst / control / sustain / mobility
- Separate progression materials
- ⚠ Plan EARLY — random picks hurt

### DAEVANION SKILLS — The Endgame Differentiator

- Skill modifiers altering how abilities function
- Example: Single-target nuke → AoE, or add lifesteal/CC
- Cannot maximize all — requires specialization
- Two same-class players can have completely different kits

### BUILD PHILOSOPHY

#### PvE PRIORITY

Offensive Daevanion nodes → Accuracy → Boss damage

#### PvP PRIORITY

Survivability → Burst windows → CC chains

# 15. NEW PLAYER MISTAKES TO AVOID

Based on KR/TW community experience — the top progression traps that slow new players.

- 01 Skipping daily dungeons** — Enhancement Stone bottleneck
- 02 Enhancing wrong items first** — Always weapon → armor → accessories
- 03 Ignoring Deviant system** — Parallel to leveling, not "do later"
- 04 Spreading Daevanion too thin** — Specialize, don't generalize
- 05 Rushing past story content** — Best XP + unlocks key systems
- 06 Ignoring Stigma planning** — Random picks hurt your build
- 07 Wasting limited weekly rewards** — High-value content first
- 08 Playing solo when groups available** — Legions accelerate everything
- 09 Over-spending Kinah early** — Bank at safe breakpoints
- 10 Ignoring life skills** — Crafters avoid Kinah walls
- 11 Not checking the broker** — Market awareness prevents undervalue sales
- 12 Upgrading temporary gear** — Early extraction returns stones
- 13 Following outdated KR advice** — Patches change meta regularly

**14 Ignoring Pantheon setup** — Free passive stats often forgotten

**15 Skipping Shugo Festa** — Easy materials, often overlooked
